

STA Validator

Stainless Steel Currency and Tokenote® Acceptor

Features:

- Error notification signal
- 2-way read on all notes
- High grade stainless steel construction
- Modular design
- Single pass currency validation
- Innovative security features
- Simplified maintenance
- High acceptance rate of currency and Tokenotes®
- Both optic and magnetic sensors for currency validation
- Self-adjusting side scan sensors
- Quick-release bill guide for easy maintenance

Hamilton's STA model validator has been engineered to reduce maintenance using advanced mechanical systems. It offers \$1-\$20 bill and Tokenote® acceptance with single pass validation. The STA Validator features a new stainless steel design and greater environmental tolerance to protect against the elements. The most innovative technology has been incorporated to provide enhanced bill validation, Tokenote® acceptance and security. The STA is a service friendly validator including a large two-digit diagnostic display and a data collection feature for accurate error analysis. In addition, the STA's quick-release bill guide makes cleaning and clearing the bill path a simple task. STA retrofit kits are available for select models of existing changers and Autocashiers.

Dimensions:

Length 7¹/₄" x Width 4¹/₄" x Height 6"
Weight approximately 7 lbs.
