

XE Validator

Currency and Tokenote® Acceptor

The Hamilton XE Validator, with its innovative technology, has become our most popular and successful validator yet. The XE utilizes optical sensors in addition to magnetic heads performing multiple checks of the bills validity. The result – a high acceptance rate on the first pass. Additional security features include a dual flipper mechanism and enhanced side scan system.

The XE Validator accepts \$1, \$5, \$10, \$20 as well as the exclusive Hamilton Tokenote® and offers a two-way read on all bills. Bill denomination acceptance can be easily selected with just the flip of a switch.

Updating the XE Validator is as simple as an EPROM change allowing new currency releases to be handled with ease. Hamilton's versatile design allows the XE to be a direct replacement for most HV series validators.
