

## Credit Card Acceptance

### Benefits

Cash carrying is rapidly becoming a thing of the past. Customers appreciate the option of conveniently paying by credit card. In fact, studies show that when using a credit card, customers often upgrade to the top dollar wash. Car wash owners report that adding credit card acceptance to their Autocashier increases opportunities for profits. Credit card transactions also reduce cash handling by attendants. When used in conjunction with the Data Access Network, card transactions can be processed in as little as five seconds and increase throughput.

Hamilton's credit card system automatically settles transactions at the same time each day and initiates the transfer of funds to your bank. The machine can fax a settlement report nightly to the fax machine of your choice.

For more information contact your local Hamilton Distributor.

## Data Access Network with Customer Value Card Acceptance

### Benefits

Adding the Data Access Network to your ACW 4 or 5 is a lucrative way to get the most out of your car wash. Create a valuable new marketing program using our exclusive new Customer Value Cards. Selling Customer Value Cards for your automatic wash from inside your convenience store or lube center is a great way to create repeat business. You can sell them as a prepaid gift card or as a fleet account card with prepay or post-pay billing options. They can be custom imprinted with your name, logo, location, etc. Customer Value Cards are a great way to keep customers coming back again and again.

D.A.N. will increase throughput by reducing credit card processing time and customer wait time significantly. By simply adding a high speed Internet connection, credit card transactions can be processed in as little as five seconds! D.A.N. can also be networked to your Hamilton Changers to easily pull audit reports or reset error codes.

### What You Need

You can choose from the Deluxe D.A.N. System (part #49-9490) that includes a Panel PC with touch screen and an integrated Customer Value Card reader and programmer or the Basic System (part #49-9489) that requires a monitor, mouse and keyboard for operation. The Customer Value Card reader and programmer (part #49-9442) is an option for the Basic System. You will also need a Serial to Ethernet converter (part #100-0088) for each Autocashier that will be connected to the D.A.N. For Autocashiers installed with credit card acceptance, an update to the CRC Computer will be needed. If your Autocashier does not currently have credit card acceptance, then you will also need the Credit Card Retrofit Kit which is described in more detail on the back of this brochure. To retrofit the Data Access Network to a Hamilton Changer, you will need a Serial to Ethernet converter and controller (part #100-0098) for each Change Machine to be connected to the D.A.N.

## Hamilton Code System POS Unit

### Benefits

With the Hamilton Code Systems, you can sell codes for your automatic wash from anywhere! Customers enjoy the convenience of buying a car wash at the gas pump, inside the convenience-store or at the car wash. Hamilton Code Systems come complete with fleet account, pay-at-the-pump and auditing capabilities. Optional remote systems are available to allow you to sell car wash codes from up to 14 different locations increasing sales potential. For added endorsement, partner with neighboring businesses to help promote their business and your car wash.

### What You Need

To retrofit a Hamilton Code System to your ACW 4 or 5, you will need the HCS System 4 (part #106-0014) that includes a POS unit with a thermal printer. In addition, you will need the adapter kit (part #106-0005) which includes a surface mount keypad and interface box to add to your Autocashier.
